PROFESSIONAL SUMMARY

Purdue Computer Science and Business Analytics student with real product and growth execution, not just classroom PM exposure. Led onboarding and marketplace improvements, built internal operations tooling, and used analytics to raise onboarding completion from 20% to 60% while growing a developer marketplace to 1,200+ users. Strong fit for product and product-operations internships that value analytical thinking, user empathy, experimentation, and hands-on execution.

CORE COMPETENCIES

- Product Analytics
- User Research
- Onboarding Optimization
- Marketplace Growth
- SQL
- Product Operations
- Experimentation
- Cross-Functional Execution
- Product Discovery
- Roadmap Thinking

WORK EXPERIENCE

ForestlyGames Jul 2020 - Present

Founder & Technical Lead | Remote

- Led development and release of 15+ game projects and related content reaching 78M+ combined game plays and video views, coordinating engineering, design, QA, and launch across 30+ developers and creators.
- Designed and built core backend game systems for data persistence, progression, live operations, and in-game economy features across multiplayer products.
- Built and tested analytics programs that identified onboarding drop-off and improved completion from 20% to 60%; grew a community to 4,000+ members.
- Coordinated a launch that reached #1 trending on YouTube Gaming.
- Owned product research, competitor scans, concept definition, progression, economy decisions, and live operations support.

DataAnnotation Jul 2024 - Jun 2026

AI Trainer & Code Reviewer | Remote

- Evaluated and debugged AI-generated code across Python, Java, JavaScript, TypeScript, C#, SQL, Lua, and HTML/CSS, finding logical errors, edge cases, and requirement violations, then writing technical feedback to improve correctness and quality.

ForestlyDevs Jul 2020 - Jul 2024

Founder & Platform Manager | Remote

- Built and operated a two-sided developer marketplace that grew to 1,200+ users and hosted 8,500+ portfolios, job postings, and project listings.
- Redesigned onboarding and growth workflows, increasing engagement by 500%+ and helping facilitate 40 new development projects in one month.
- Owned marketplace operations across user onboarding, workflow improvements, and support for project discovery and coordination.

PROJECTS

Purdue Dining Product Research **Product Research**

Student-led product research initiative around the Purdue Dining app and service friction.

User Research | Product Strategy | Experience Analysis | Recommendation Synthesis

ForestlyGames Operations Platform **Flagship**

Built and deployed a production operations platform to manage projects, budgets, staffing, payments, and delivery across multiple studios. Product scope: market research, competitor scans, concepts, core loops, progression, economies.

Next.js | TypeScript | PostgreSQL (Neon) | Drizzle ORM | NextAuth | Discord API | Vercel

Jat App **Spring Boot + Next.js**

Built a full-stack app for goals, tasks, and job applications with a Spring Boot REST API and Next.js front end; designed entities, repositories, services, DTOs, and centralized exception handling, with JUnit tests, then containerized with Docker.

Java | Spring Boot | Next.js / React | TypeScript | PostgreSQL | Docker

EDUCATION

Purdue University | **West Lafayette, IN** Expected May 2028

B.S. Computer Science and B.S. Business Analytics & Information Management | GPA 3.84 | Dean's List & Semester Honors | The Data Mine | IBM Data Science Professional Certificate (2026) | Salutatorian, Carroll High School

SKILLS

Languages: Java, TypeScript, JavaScript, Python, SQL, C#, Lua, HTML/CSS

Frameworks & APIs: Spring Boot, Next.js, React, Node.js, REST APIs, NextAuth

Data & Infrastructure: PostgreSQL, Drizzle ORM, Neon, Docker, Vercel, Firebase, Git/GitHub

Practices & Tools: product analytics, experimentation, onboarding optimization, cross-functional execution, SQL, product operations, Agile/Scrum, Claude Code, Codex, MCP, product execution, cross-functional collaboration
